

UKCPA pre-registration poster marking form and guidelines

Please assess the pre-registration pharmacist posters on the following:

1. Originality

How original is the study?

How does it contribute to existing knowledge or pharmacy practice?

3. Results

Are the results clearly presented in sufficient detail?

Are appropriate methods used to present data (tables, graphs etc)?

Are the statistical methods used appropriately, with valid analysis?

Does the data support and justify the conclusions?

Does the data and/or evaluation support any recommendations or conclusions?

2. Methodology

Is the study design appropriate for the research question?

Are the methods and measurements adequately and clearly described, including audit standards if appropriate?

Does the poster specify the target (patient) group as appropriate?

Is appropriate reference made to ethics approval status?

4. Presentation

Does the poster have visual impact?

Is the information well presented and easy to understand?

Is there a good use of visual displays of data, images, etc?

Feedback for presenters

We have also asked you to provide constructive feedback for the authors on the presentation of their poster; this is important particularly for new presenters who can learn much from the views of expert markers.

Poster	Originality of study	Methodology	Results	Presentation	Total score	Comments (eg why you think this is the best poster)	Feedback on poster presentation for authors
	0 – 5	0 – 5	0 – 5	0 – 5	0 - 20
